5. Claims 1-8, 11 and 12 are rejected under 35 U.S.C. 102(a) and/or (e) as being anticipated by Oswald et al ('633).

The claims are considered to be clearly met by Oswald et al ('633) who disclose, inter alia, a system and method for discriminating a target having based the information on, amongst other factors, the radar cross section of the target (see page 7, paragraphs [0111-0116]). In addition, Oswald et al ('633) disclose imaging the target for display and also for discriminating between the types of target (see page 5, paragraph [0067]).

Allowable Subject Matter

6. Claims 9 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited prior art show various radar systems.
